

Eff-Active™ Efflorescence Cleaner & Inhibitor

How it works: The Aqua Seal STS™ Product Trouble Shooting Guide covers the most common application issues and problems associated with each Aqua Seal STS™ product.

Problem: If the product problem you are experiencing is not covered by the Product Trouble Shooting Guide then it is most likely job specific. Please contact Aqua Seal STS™ direct for more detailed advice and information.

Solutions: The solutions described are not necessarily the only way to solve the specific problem. They are based on giving you the most efficient & direct solution without resorting to more complex solutions that may require a professional trades person. If the solutions outlined do not solve the problem it is most likely job specific. Please contact Aqua Seal STS™ direct for more detailed advice and information.

Note: Always read entire product label, SDS & product technical bulletin before using. Do a test area first.

Problem	Reason	Solution
Does not totally remove efflorescence deposit.	<ul style="list-style-type: none"> • Insufficient dwell time. • Efflorescence deposit too heavy. 	<ul style="list-style-type: none"> • Allow to dwell up to 45 minutes. • After dwell time clean with an abrasive pad or brush or high-pressure water. • Use OxiTreat HD™ to remove heavy deposits then treat with Eff-Active™ to further inhibit. • Some deposits are too heavy for Eff-Active™ or OxiTreat HD™ to remove. These heavy salt deposits can only be removed by abrasion. • Eff-Active™ will inhibit efflorescence • By also sealing the surface after using Eff-Active™ you will further inhibit future efflorescence.
Does not stop efflorescence.	<ul style="list-style-type: none"> • Eff-Active™ inhibits efflorescence. • Only one application applied. • Dwell time too short. 	<ul style="list-style-type: none"> • Allow to dwell for 45-60 minutes and more than one application may be required. • Eff-Active™ will inhibit efflorescence • By also sealing the surface after using Eff-Active™ you will further inhibit future efflorescence.
Visible residue (sometimes sticky).	<ul style="list-style-type: none"> • Eff-Active™ not completely rinsed/wiped off surface • Solution too strong. 	<ul style="list-style-type: none"> • Rinse with plenty of clean water and where possible use a wet vacuum • Use Aqua-Seal STS MicroScrub and white pad. Rinse thoroughly.
Dull or marked surface.	<ul style="list-style-type: none"> • Eff-Active™ can dull some polished calcium-based stone (marble, limestone, travertine etc). 	<ul style="list-style-type: none"> • Re-polish surface with ReShine, Polish Pro or 5X Pro. • Call Aqua-Seal STS for advice.
